\*\* Data Suppressed to Protect Confidentiality or Data is not Statistically Reliable

As it is unclear how many people would live in a one-bedroom unit, it could be one person with a shelter allowance of \$390 per month or two people with a combined shelter allowance of \$642 per month. To compensate for this uncertainty, the OW rate was modified. This model assumes that the average shelter allowance for a one-bedroom unit would be the mid-point between the shelter allowance for one person and two people and is set at \$516. [i.e. Difference between OW Max Shelter Allowance for 1 person (\$384) & 2 people (\$632) = \$248. Mid-point = \$384 + (248/ 2) = \$508]

Modified OW Shelter Allowance = \$516 \* 105% = \$542 (accounts for uncertainty if 1 or 2 people live in a 1-bdrm unit)
